

SuperPlan

Profile

My name is Andrea, I am 47 yo, i live in Singapore. I work as Head of Engineering in Grab.

My girlfriend is Angel, 41, we live together.

I am in the process of setting my own personal objectives for H2 '26. The fundamental background to that is that I can get super busy with work and its schedule, thus it becomes super important that I am deliberate and intentional about the non-work part of my life that I care about, so it's not neglected.

So what i am trying to do here is:

- Establish what are the various objectives / targets that i want to accomplish during the remaining time of 2026, split in different categories
- Make sure that I have a practical plan to actually achieve those objectives, including habits, reminders etc..
- Make sure that I have a practical way to track progress, if there are part of the plan that are falling behind etc...

Targets & How to Achieve

ID	CATEGORY	TARGET (End 2026)	BASELINE (Aug 2026)	PLAN
1	Wellness ▾	Reduce weight to 79kg	85.9kg (-6.9kg)	• No food after 9pm • No bread & heavy carb food (pasta, rice etc) • No sweets - incl office • No sugary drink • 6 days/week go to gym • 6 days/week target strain achieved
2	Wellness ▾	Reduce BMI to 24	27.1 (-3.1)	• Same plan as (1)
3	Wellness ▾	Achieve daily stain target at least 6 days/week	2/days week	• 6 days/week go to gym
4	Wellness ▾	Weekly average sleep performance + Weekly average recovery performance >= 80% (from Whoop)	~65%	• Go to sleep by 11pm • Drink min 2L water per night • Solve the AC problem with Angel • No alcohol
5	Wellness ▾	Take 100% of expected supplements intake	~5%	• Supplements plan (daily)

ID	CATEGORY	TARGET (End 2026)	BASELINE (Aug 2026)	PLAN
1	Wellness ▾	Reduce weight to 79kg	85.9kg (-6.9kg)	- No food after 9pm - No bread & heavy carb food (pasta, rice etc) - No sweets - incl office - No sugary drink 6 days/week go to gym 6 days/week target strain achieved

12	Social Growth ▾	>=1 outing / month with an SG friend	To be done	N/A
13	Social Growth ▾	>=1 connect with an Ams friend every 2 weeks	To be done	N/A
14	Personal Finances ▾	Complete the re-allocation of equity funds as per plan	To be done	N/A
15	Personal Finances ▾	Update tracker automation for trends and monthly burn-rate	To be done	N/A

What I Am Already Using

- I wear all the time my whoop 5.0 which tracks strain and sleep performance
- I use a smart scale Renpho which measures and saves weight and BMI, i use the Renpho Health app
- I use an Android phone
- I record my books read and to read on GoogReads
- UltraLearn is an app that I created on my own, which runs on my mac and has those modules. I can update the code so that progress is saved where needed.
- I have a Medium subscription

Requirements / What To Solve

- I want a webapp that helps me tracking progress towards these goals
- I will host this webpp in my ubuntu server
- The webapp must be usable from both desktop and mobile browser
- The webapp must allow to:
 - See the targets
 - See progress for each targets
 - Where needed manually add “progress samples” to each targets
 - As much as possible, the webapp should pick progress by itself from various sources: whoop (which includes weight imported from the scale), medium, goodreads, UltraLearn
- The webapp must be visually pleasing, but very functional
- For each target, i need to be able to see how i am trending over time

Supplements Plan

SUPPLEMENT	HOW MUCH	WHEN	WHY
Vitamin D3	1,000 IU	Breakfast	Covers potential insufficiency from predominantly indoor work
Omega-3	1000 mg	Breakfast	Useful if you eat oily fish fewer than twice weekly
Creatine monohydrate	5mg	Any consistent time (Breakfast)	Helps maintain strength and lean mass during weight loss
Magnesium glycinate	200–300 mg elemental magnesium	60–90 min before bed	Covers dietary gaps; may modestly help relaxation if intake is low
